Dear Admissions Officer:

This letter is written to clarify a question about Introduction to Experimentation 01:160:171, a one-semester course that accompanies the two-semester lecture sequence, General Chemistry 161-162. The laboratory carries one credit, with three hours of laboratory exercises per week. It is normally taken by all students who require general chemistry, including chemistry majors.

The Life Sciences Department, which requires a standard general chemistry course of its majors, including those anticipating a research career, accepts this one-semester course. The Health Professions Office accepts this sequence for students anticipating application to post-graduate study in the health professions. The Department of Chemistry has determined that its course meets all requirements.

If you have any questions, please feel free to contact our office.
